Dear Parent/Teacher:

This coloring book has been designed to introduce children to some of the rewarding careers available in health care. The drawings feature just a few of the 200 exciting careers that are available. Most children know about a doctor or nurse, but there are so many more opportunities in the medical field.

We hope you enjoy looking through this book with your children. If they have questions about a particular career, please encourage them to find out more. If you have any questions about the careers highlighted in this book, or about any of the other health care career opportunities, we encourage you to explore www.okhealthcareers.com.

The Oklahoma Hospital Association would like to thank the following organizations for donations of their time, talent and resources:

Oklahoma AHEC (Area Health Education Centers) - for their generous contribution of allowing the re-print of their original coloring book.

Artist H. Shayne Liles, the original artist - for many of the pictures shown in the book and for allowing us to reproduce his artwork.

Bowman Holt, Inc. - for additional occupational illustrations.

Draw Yourself As A Health Care Hero
